

I would like to urge The FCC to not implement any proposal that lessen Indiana's Telephone Privacy Law. This Law has been most effective in reducing annoying Phone calls to my residence. We used to get hundreds of unwanted call a week, now we only get a couple of call a week. I think that any proposal to make a national telephone privacy law should be a minimum law and not override a law that a state has enacted to cover the citizens of their State. I am very happy With the Indiana State Telephone privacy Law and i would not like to see it diminished. Thank You
